

Dear Aramex Recruiting Team,

I'm writing to express my strong interest in the Junior Full-stack .NET Developer position at Aramex in Cairo. As a recent graduate of the Information Technology Institute (ITI) full-stack web development program, I've built hands-on experience in developing modern, scalable web applications using the latest technologies.

During my training, I worked extensively with C#, ASP.NET Core, Entity Framework Core, Angular, and SQL Server to build full-stack applications. I've implemented RESTful APIs, followed SOLID principles, and written unit tests using xUnit, with Git as my version control system. I'm also comfortable integrating third-party APIs and libraries and building mobile-first, responsive web interfaces.

I'm eager to apply my skills in a real-world setting, contribute to impactful projects, and grow alongside experienced developers.

Thank you for considering my application. I would welcome the opportunity to discuss how I can add value to your team and contribute to Aramex's success.

Best regards,
Ahmad Mostafa
